

Euromixers heavy-duty Direct and Gear drive portable mixers are designed for the European market and provide excellent value for a wide range of mixing applications.

DIRECT DRIVE PORTABLE MIXERS

Drive portable mixers are a popular choice and offer an effective and economical solution for mixing low viscosity products.

Mounting options include clamp or cup plate Shaft and impeller are 316 stainless steel.

GEAR DRIVE PORTABLE MIXERS

Gear drive mixers offer a cost effective solution for small batch mixing applications where versatility is essential.

Drives are filled with food grade lubricant and sealed for life

MOUNTING OPTIONS

- Clamp - for quick and easy mounting onto the tank rim and
- Cup plate - for bolting onto the tank rim or mounting structure
- Transportable stand

Clamp mounting

Cup plate mounting

Transportable stand

DRIVES

Standard electric motors are 380 - 415 v 3ph 50 hz options include

- Single phase motors 220 - 240 v or 110v
- Electronic variable speed
- Air motors - Gast

IMPELLERS

Portable mixers are normally supplied with a general purpose impeller suitable for low viscosity products, other impeller types are also available including radial flow, saw tooth, E-200 and E-400 folding impellers, selected for specific applications.

DIRECT DRIVE PORTABLE MIXERS

Standard TEFV Electric motors - 415v 3ph 50 hz

MIXER MODEL	MOTOR KW	SHAFT SPEED
DP-25	0.25	1400 rpm
DP-75	0.75	1410 rpm
DP-150	1.50	1400 rpm

AIR DRIVE

MIXER MODEL	MOTOR KW	SHAFT SPEED
DP-25A	0.25	300 - 1500 rpm
DP-75A	0.75	300 - 1500 rpm

GEAR DRIVE PORTABLE MIXERS

Standard TEFV Electric motors - 415v 3ph 50 hz

MIXER MODEL	MOTOR KW	SHAFT SPEED
GP-18	0.18	285 rpm
GP-25	0.25	265 rpm
GP-37	0.37	265 rpm
GP-75	0.75	285 rpm

AIR DRIVE

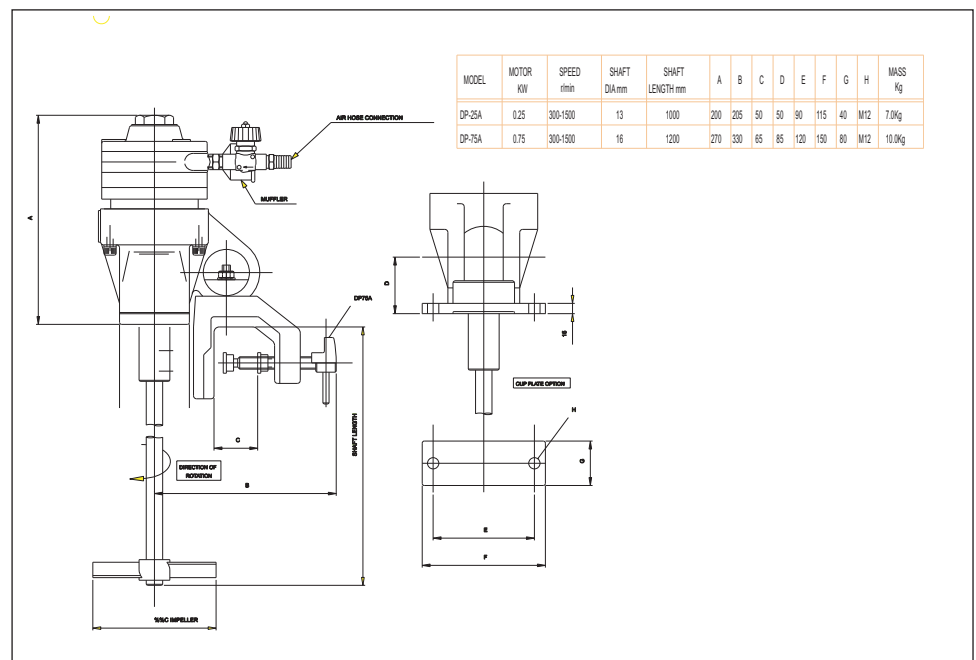

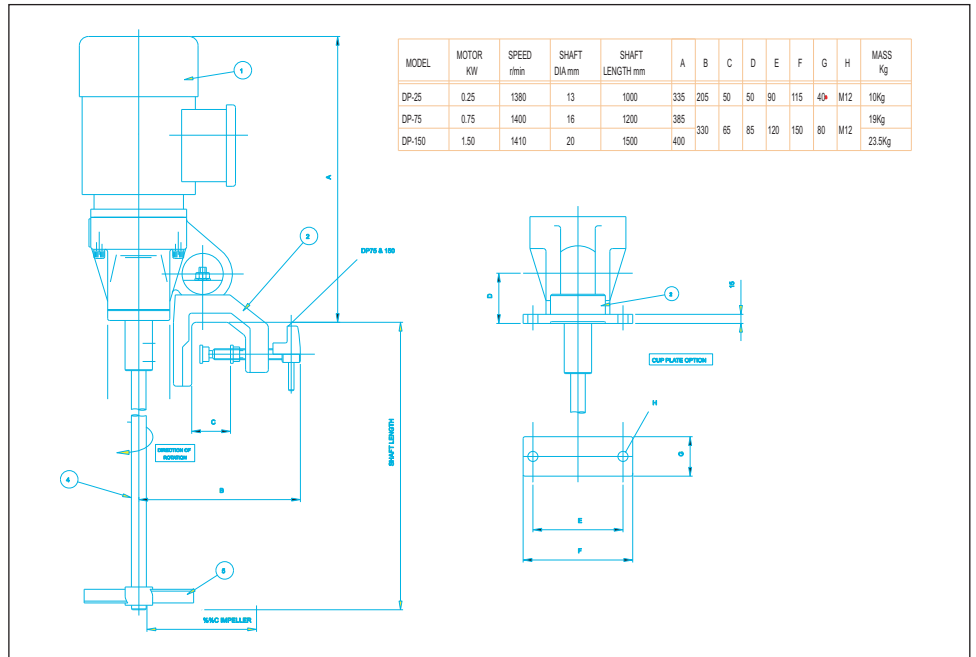

MIXER MODEL	MOTOR KW	SHAFT SPEED
GP-25 AIR	0.25	60 - 285 rpm
GP-75 AIR	0.75	60 - 285 rpm

ATEX

Mixers for use in hazardous areas with potentially explosive gas or dust environments are available - our engineers will be pleased to advise.
