

Euromixers Direct drive Hygienic stainless steel mixers are fitted with stainless steel motors and housing to meet the demands of the food and drinks, pharmaceutical and cosmetics industries.

Mixers mount quickly, easily and securely directly onto the mixing vessel using a standard Tri-clamp fitting, thus enabling the mixer to be removed for cleaning or moving the mixer / vessel to another location.

DRIVES

Stainless steel mixers with motors from 0.18Kw

OPTIONS

Options are available with removable motors to enable wetted parts mixer shaft and impeller to remain with the vessel for sterilisation.

Mixers can be fitted with dry running mechanical seals or lip seals

IMPELLERS

Impellers are selected to meet the process requirement.

FINISH

Wetted parts are finished to the clients specification which can include a mirror polish as standard, or mechanical polish + electro polish
